

SAID AHRIKENCHIKH

GRADUATE EMBEDDED SYSTEMS ENGINEER

24 years old, Abizar Village, Tizi Ouzou, Algeria. Berbersoft@gmail.com +213 560 117 221

PROFILE :

I hold a Master's degree in Integrated Systems Electronics from UMMTO, Algeria, which is recognized at Level 7 in the European framework through an ENIC-NARIC certificate. My focus areas include embedded systems, embedded AI, and IoT.

And i have completed hands-on projects involving microcontrollers, computer vision, native Android development, and machine learning for real-time sign language translation and physical system monitoring

TECHNICAL SKILLS :

Embedded systems and hardware: Arduino, ESP32, STM32, VHDL, microcontrollers, and sensors.

Software and tools: Cloudinary, Simulink, Proteus, Visual Studio, Vercel, Netlify.

Portfolio: <https://berbersoft02-portfolio.vercel.app/>

Web and mobile development: Next.js 15, React 19, TypeScript, Tailwind CSS, Android (Kotlin/Java).

Artificial Intelligence and Data: Design, training, optimization, and deployment of machine learning and deep learning models.

Programming: C++, Node.js, Kotlin, Python, MATLAB, Git.

ACADEMIC PROJECTS :

Master's Project: Design and Implementation of a Sign Language Translation System | 2025

Mouloud Mammeri University of Tizi Ouzou (UMMTO), Algeria

Project recognized with the national designation "Innovative Project" (November 2025, score 19/20) awarded by the National Commission under the Ministry responsible for the knowledge economy.

Development of a native Android application that incorporates an AI model for the real-time recognition of sign language gestures, with text output and speech synthesis

Training and optimization of the model for real-time detection and recognition through the smartphone camera (latency and accuracy tailored for practical application).

Bachelor's Projects: Connected Weather Station (IoT) and Motor Speed Control System | 2023

Mouloud Mammeri University of Tizi Ouzou (UMMTO), Algeria

Prototyping an autonomous weather station utilizing the ESP32 and DHT22 sensor, along with the development of a responsive web interface (HTML/CSS) hosted on the microcontroller for real-time visualization of environmental data via Wi-Fi.

- Modeling and implementation of a servo control system on Arduino, incorporating a speed sensor and PWM controller to maintain a constant speed under varying loads.
-

EDUCATION :

Master's Degree in Integrated Systems Electronics | 2025

Mouloud Mammeri University of Tizi Ouzou (UMMTO), Algeria

- ENIC-NARIC comparability certificate: level 7 (Master) of the European Qualifications Framework, granting access to doctoral studies and the job market within the field of specialization.

Bachelor's Degree in Electronics | 2023

Mouloud Mammeri University of Tizi Ouzou (UMMTO), Algeria

Baccalaureate in Mathematics | 2020

Frère Aitbata Secondary School, Timizart

ADDITIONAL INFORMATION :

• LANGUAGES :

Kabyle: Native language

French: C1

English: C1

Arabic: Proficient

• Mobility :

Open to relocation across Europe and prepared to complete the required visa and residence permit procedures.
